CubeServ: Generating Reports 100 Times Faster with SAP® Analytics Cloud

When they need systematic data analysis, CubeServ is one of the first firms companies call. Customers appreciate its unparalleled consulting and the ability to obtain such services from a single source. Meanwhile, CubeServ relies on high-performance analytics solutions for its own reporting as well – typically in on-premise configurations. Recently, however, this SAP partner shifted its focus to take advantage of the cloud.

“SAP® Analytics Cloud gives us all the processes we need in a single solution, including for planning, visualization, and predictive analytics,” explains Norbert Egger, managing director and board chairman at CubeServ. A number of functions were ready to use just a few days after the company began implementing the solution. With it, CubeServ can now analyze and visualize its business data up to 100 times faster. Egger adds, “The self-services and overall value for the money you get with SAP Analytics Cloud are really hard to beat.”

Generating Current Reports Anytime with SAP® Analytics Cloud

With SAP Analytics Cloud, SAP partner CubeServ is experiencing faster data uploads, integration, and analysis. The result is faster reporting and deeper business insight.

Before: Challenges and Opportunities

- Start using a flexible, forward-thinking, and affordable cloud platform for analytics
- Reduce the time needed to prepare dashboards for quarterly reports (including profit-and-loss statements, current orders, and forecasts)
- Implement self-service tools for generating reports whenever needed

Why SAP

- SAP Analytics Cloud, which facilitates centralized views, planning, and predictive data analyses
- Support for integration with the SAP Business Warehouse application and existing data logic
- Ability to fully migrate current data to the cloud or visualize it there through Web reporting
- Flexible subscription model that is ideal for small numbers of users
- Future ability to merge internal and external data in order to create the entire corporate group's annual report in the cloud

After: Value-Driven Results

- Significant reduction in reporting effort
- Intuitive tools that enable even unskilled users to quickly generate and view simple reports
- Flexible options for combining data and models into custom dashboards

“Creating models and defining key performance indicators for our quarterly meeting dashboard couldn't be easier, thanks to SAP Analytics Cloud.”

Norbert Egger, Managing Director and Board Chairman, CubeServ AG
